Marketing Performance Insights

Key Insights

- TikTok was the top-performing platform in terms of impressions, clicks, and conversions, contributing the largest share of overall campaign results.
- Google Ads delivered strong conversion results while operating with a lower budget than TikTok, suggesting efficient campaign performance.
- Facebook generated the lowest volume of traffic and conversions among the three advertising platforms during the reporting period.
- The overall Click-Through Rate (CTR) across all campaigns was approximately 1.7%, indicating a moderate level of audience engagement.

Data Quality & Preparation

- Data from Facebook Ads, Google Ads, and TikTok Ads was combined into a unified reporting dataset to enable cross-platform analysis.
Column structures were standardized across all data sources to ensure consistency in reporting and visualization.
- A CTR metric was calculated as $(\text{Clicks} \div \text{Impressions}) \times 100$ to measure campaign engagement.
- Key metrics, including impressions, clicks, conversions, and spend, were reviewed to ensure completeness and consistency before building the dashboard.
